

Avonmore Associates

SPECIALISTS IN TURF MANAGEMENT

Investment has it's rewards

By the end of week commencing 22nd October 2011, and within a 6 week period, Avonmore Associates will have completed the Autumn renovation works on over 100 bowling greens.

In early Summer, Phil Buttler decided the time was right to take a look at our machinery inventory, whilst not very old we wanted to increase productivity! During July and August, we had a number of the leading turf machinery manufactures demonstrate their products for different applications. We subsequently ordered and took delivery of a number of pieces of machinery including scarification and aeration equipment with a total investment of over £30,000.00

Autumn / end of season works can consist of any or ***all*** of the following fine turf practices.

- Deep scarification's in multiple directions.
- Ground Breaking.
- Hollow Coring.
- Power Brushing.
- Solid & Deep Slit Tine.
- Top Dressing.
- Liquid Fertilising.
- Application of Herbicides.
- Over-seeding with a suitable seed mix.

Autumn renovation works varies from green to green and club to club depending on the greens requirements.

One of our clients asked, recently, if our staff had been trained by a choreographer ! We have so many men and so much machinery in such a small space that they look as if they are working in time to a set piece – all we needed was some background music !

Maybe we should enter the 2012 Olympics for synchronized turf renovation.
